

# The RIGHT EYE TEMPLATE

Each of the 24 circuits connects with an organ, glands or part of the body.

The RIGHT EYE TEMPLATE shows these organs and their connections to the vertebrae of the spine. The circuits can be felt in points on the body where there is a pulse beat. Each circuit has a frequency which produces a colour and a sound. The colors and sounds are shown in the RIGHT EYE TEMPLATE. For instance we see green through the Liver and to make the sound of SSSSSSS we have to vibrate the Liver.

These colors and sounds are used throughout these explanatory pages and in the EARTHSONG calendars.

Two organs have 2 sounds (the Cerebellum and the Spleen). The Bladder circuit (H) is towards the nose.

Each of these 24 circuits gives us an “**aspect**” of consciousness.

Each aspect has 4 “**spaces**” corresponding to the centres.

These spaces have a negative and a positive state and they are places in the body. In each space are 4 idea structures: a thought, a feeling, an e-motion and an experience.

Thus the bioelectronic template of human consciousness for the right eye consists of 4 times 24 equals 96 spaces.
