

The points on the body for the 96 spaces

RIGHT EYE

The 96 bioelectrical points for the right eye are shown here in the spaces of the iris. If you have a jewel or a pool in the right iris you can correlate it with the point on the body using this template. If there is stress currently in any of the circuits/organs this will manifest as red veinlets in the white of the eye. The veinlet will be going towards the edge of the iris in the location of the circuit which is being affected. In the right eye the jewels and pools indicate that at the time of the mood you will be affected by a **condition** because the space is producing negativity as the earth's Pulse tunes it. This happens every 12/24 days. These conditions and their positive states are shown in the right eye state templates below.

The points on the body for the female eye

LEFT EYE

The left eye points and those in the throat are shown here. The points in the Mind ▲ and the Hara ■ are different to those in the right eye. Each circuit in the left eye checks with 2 spaces in a different circuit. The Hara ■ points are on the arms. There are 2 circuits which check with only one other organ's circuit. These are the Stomach ▼ and the Penis/Vagina | circuits.

A jewel or a pool in any of the spaces in the left eye indicates that during the mood there will be an issue with a belief that is not true. In the body this may manifest as a mole, a wart or simply discomfort. These disappear when the bioelectrical circuit is cleared.
